Dr. B.R. Ambedkar Veedhi,  
Bengaluru - 560001

**Sub:** Issues to be addressed by UIDAI

With reference to letter No. DPAR 08 EGOV 2017 dated April 4, 2017 regarding issues to be addressed by UIDAI, the point-wise response is given hereunder:

**Point No. 1:** UIDAI is continuously working with device vendors and STQC for timely implementation and certification of the registered devices. As on date, a number of device providers have applied for STQC registered device certification and many of them are in the final stages of certification. In addition, various device vendors have also given their undertakings regarding their preparedness for Registered Device regime, which were circulated by UIDAI vide OM dated 16.03.2017 (copy enclosed).

With regard to Auth API 2.0, it is intimated that UIDAI is shortly enabling access of authentication pre-production system with authentication API 2.0 and the same will be intimated to all the AUAs. However, UIDAI has already deployed authentication API 2.0 in staging server and the same can be instantly used for development and testing purpose.

**Point No. 2:** Necessary directions have already been issued to ADMS agency and it is expected that they will start pickup soon. Meanwhile, UIDAI has recently introduced offline scanning wherein EAs are required to scan the documents lying with them and upload them directly to CIDR through UIDAI's client. This facility may be used for uploading the documents lying with your EAs.

**Point No. 3:** It is intimated that UIDAI has recently increased assistance to Registrars for per Aadhaar generation from Rs.40/- to Rs.50/-. Registrar EA has to bear the cost of GPS procurement. It has been decided that no exception would be provided for GPS mandating.
